UNOS Commercial Growth Plan (Illustrative) — H2 2026: OPO Segment

Integrated marketing + sales plan | Croom Lawrence | July 2026 | Confidential draft for discussion

1. Mandate

- **Win the OPO segment first:** package UNOS data, benchmarks, education, and implementation advisory into the **OPO Quality, Accreditation & AI-Readiness solution** — helping all ~55 OPOs improve performance, protect accreditation, reduce administrative burden, and turn transplant data into operational action.
- **Set a $10M 2026 qualified sales pipeline objective:** this is a projected funnel objective, not a revenue-recognition promise. It creates commercial coverage against UNOS's FY2025 financial pressure and demonstrates that the CGO motion can identify larger contract-value opportunities.
- **Use the OPO motion as UNOS's first proof point:** a best-in-class, repeatable B2B pipeline that proves commercial discipline while protecting mission, public trust, and compliance.
- **Grow deliberately and compliantly:** every motion should be designed so UNOS can call, grow, learn, build, and demonstrate value without creating any perception of "monetizing patient data."

2. Financial context and 2026 commercial objective

The financial audit shows UNOS is financially pressured but not distressed. FY2025 revenue declined materially, expenses were reduced, and the organization still reported a deficit.

Financial baseline from public 990 analysis	Working implication
FY2025 total revenue: ~$76.6M, down ~20.1% YoY	Revenue diversification and higher-value commercial packaging are urgent.
FY2025 expenses: ~$84.2M, down ~18.0% YoY	Expense discipline alone is not enough; growth must contribute to operating leverage.
FY2025 operating deficit: ~$7.6M	A $10M qualified pipeline creates visible coverage against the breakeven gap, while recognizing not all pipeline converts or recognizes in-year.
Program service revenue: ~$68.0M / ~88.8% of total revenue	Concentration risk requires new products, customer segments, and partner revenue streams.
OPTN modernization / multi-award context	UNOS must prove it is the best performance-infrastructure partner, not rely on incumbent status.

2026 objective: build **$10M in qualified OPO sales pipeline** by Dec. 31, 2026, with clear stage definitions, account ownership, deal economics, and compliance guardrails.

Important framing: $10M pipeline is not a claim that $10M will close or be recognized in 2026. It is a disciplined funnel target that can produce near-term pilots, 2027 subscription/advisory revenue, and executive proof that UNOS can generate mission-aligned commercial demand.

3. Pipeline math: how $10M is built from ~55 OPOs

The OPO market is small enough for account-based depth and large enough for meaningful contract value. The $10M objective requires moving beyond small diagnostics into enterprise transformation packages.

Segment	Account universe	Offer	Illustrative pipeline value	Pipeline target
Tier 1: highest-risk / highest-readiness OPOs	10–12	OPO Performance Command Center + AI-readiness roadmap + implementation advisory	$500K–$750K each	$5.0M–$6.0M
Tier 2: quality/accreditation improvement OPOs	18–22	Benchmark analytics + accreditation-risk early warning + quarterly	$175K–$300K each	$3.5M–$4.0M

		advisory		
Tier 3: diagnostic / readiness motion	20–25	Paid or sponsored diagnostic, self-assessment, executive workshop, data-quality review	$25K–$100K each	$1.0M–$1.5M
Strategic partner / grant-funded OPO improvement pool	2–4 opportunities	Foundation, government, device/logistics/technology partner-supported performance initiatives	$250K–$750K each	$1.0M–$1.5M
Total qualified pipeline	~55 OPOs + partners			$10M+

4. Objectives (Aug–Dec 2026)

- **Coverage:** 100% of ~55 OPO accounts mapped, tiered by accreditation/performance risk, readiness, technology maturity, and likely contract value by Aug. 31.
- **Engagement:** 45+ OPOs engaged through an executive meeting, roundtable, webinar, diagnostic, self-assessment, or account-specific brief by Q4.
- **Pipeline:** 25–30 sales-qualified opportunities and **$10M+ qualified pipeline** by Dec. 31.
- **Conversion:** 4–6 paying OPO pilots or diagnostics signed by Dec. 31; 2–3 referenceable case studies in motion.
- **Operating system:** Salesforce pipeline discipline, HubSpot demand engine, account-based content, and full-funnel KPI dashboard live by Sept. 30.
- **Financial discipline:** every proposal includes price, cost-to-deliver, gross margin, compliance review, delivery owner, and expansion path before submission.

5. Strategy

- **Anchor offer: OPO Quality, Accreditation & AI-Readiness solution** — combining UNOS OPO Benchmark Report, Organ Utilization Tool, accreditation-risk early-warning, data-quality review, executive dashboarding, and implementation advisory.
- **Premium offer: OPO Performance Command Center** — a higher-value package that helps OPO leadership move from static reporting to predictive insight, prioritized interventions, and board-ready performance management.
- **Positioning:** UNOS as the trusted performance partner that keeps OPOs improving, accredited, AI-ready, and mission-aligned — burden reduction and quality improvement, never "selling data."
- **Pricing:** tiered diagnostic-to-subscription model; advisory priced with FTE/activity-based costing so sales and delivery maintain margin visibility.
- **Segment math:** ~55 accounts means account-based depth over broad volume — multi-threaded executive relationships, peer proof, and account-specific value hypotheses beat generic demand generation.
- **Deal discipline:** qualification scorecard covering mission fit, deliverability, gross margin, compliance, data permissions, executive sponsor, and expansion potential; maintain a visible "deals we do not chase" list.

6. Packaging architecture

Package	Buyer	Scope	Pipeline value
Accreditation-Risk Diagnostic	CEO, quality leader, board/PI leader	30–45 day diagnostic, benchmark snapshot, risk/opportunity readout, action plan	$25K–$75K
OPO Quality & Accreditation Subscription	CEO, COO, quality/PI director	Quarterly benchmarks, risk early-warning, performance dashboard, advisory reviews	$150K–$250K/year
OPO Performance Command Center	CEO, COO, medical director, board	Integrated benchmark + utilization + workflow + data-quality + AI-readiness operating system	$500K–$750K pipeline value
AI-Readiness / Data-Maturity Transformation	OPO executive team, CIO/data lead	Maturity assessment, roadmap, governance, responsible AI use cases, operating cadence	$150K–$400K
Partner-funded OPO Improvement Initiative	Foundations, government, logistics/device/tech partners	Multi-OPO performance initiative tied to organ utilization, equity, safety, logistics, or data modernization	$250K–$1M+

7. Marketing tactics — building the $10M funnel

Top of funnel — create awareness and demand

- **Category narrative:** "UNOS as the trusted OPO performance and accreditation partner" — one message architecture across executive, operating, and market channels.
- **Flagship content:** annual **State of OPO Quality & AI-Readiness** benchmark report; gated executive summary and OPO self-assessment.
- **Thought leadership:** quarterly OPO performance point of view; amplify Mark's published process re-engineering work; CEO/CGO bylines in AOPO channels.
- **Executive presence:** AOPO, NATCO, UNOS-hosted Richmond roundtables, quality-leader webinar series, private CEO dinners/briefings.
- **Account-specific value briefs:** one-page "where we see opportunity" briefs for top 20 OPOs, using only appropriate and permissioned data.

Middle of funnel — nurture and qualify

- **ABM plays by tier:** tailored journeys for Tier 1, Tier 2, and diagnostic accounts.
- **HubSpot nurture streams:** triggered by report downloads, self-assessment completion, webinar attendance, and roundtable participation.
- **Peer proof:** pilot case studies, customer panels, and reference calls brokered between OPO leaders.
- **Role-specific messaging:** CEO, COO, quality/PI director, medical director, procurement leader, data/technology leader, board/stakeholder audience.
- **Compliance-by-design:** every content asset uses mission, quality, accreditation, burden reduction, and data governance language — not extractive commercialization language.

Bottom of funnel — convert

- **Conversion offer:** accreditation-risk / performance diagnostic that naturally scopes a paid pilot or subscription.
- **Proposal kit:** ROI model, accreditation-risk framing, implementation plan, data-governance guardrails, delivery plan, expansion map.
- **Executive sponsor program:** CGO/CEO engagement on every late-stage Tier 1 or Tier 2 opportunity.
- **Deal desk:** weekly pricing, margin, deliverability, compliance, and legal review for proposals above threshold.

8. Sales tactics — pipeline and conversion

- **Named-account coverage:** every OPO owned; top 20 highest-risk/highest-readiness accounts receive CGO-led executive engagement.
- **Whale discipline:** focus senior human time on the largest, most mission-aligned opportunities; automate lower-value nurture where possible.
- **Pipeline operating system:** single Salesforce pipeline with exit criteria: Target → Engaged → Diagnostic Accepted → Qualified Opportunity → Proposal → Negotiation → Closed / Deferred / No-Chase.
- **Multi-threading:** minimum 3 contacts per active account; Tier 1 accounts require 5+ contacts across CEO, operations, quality, medical, and data/technology leadership.
- **Land-and-expand:** diagnostic → pilot → subscription/advisory → command center → partner-funded expansion.
- **Sell-deliver alignment:** delivery lead joins late-stage calls; cost-to-deliver and margin agreed before proposal submission.
- **90-day sprint:** first signed OPO diagnostic-to-pilot conversion is the sales proof point; first marketing-sourced opportunity is the marketing proof point.

9. Funnel KPIs and metrics

Top of funnel: awareness → engagement

KPI	H2 2026 target	Cadence
Target-account coverage	55/55 by Aug. 31	Monthly
Accounts tiered by risk/readiness/value	55/55 by Aug. 31	Monthly
Account engagement rate	80%+ of OPOs	Monthly
Benchmark report downloads / self-assessment completions	40 accounts	Monthly
Webinar / roundtable attendance	35 unique OPO accounts	Per event
Marketing-qualified accounts	30–35 accounts	Monthly

Middle of funnel: qualification → opportunity

KPI	H2 2026 target	Cadence
Discovery / executive meetings booked	40+ meetings	Weekly
MQA → meeting conversion	65%+	Monthly
Diagnostics accepted / started	18–22	Weekly
Sales-qualified opportunities	25–30	Weekly
Qualified pipeline value	$10M+	Weekly
Multi-threading depth	3+ average; 5+ for Tier 1	Monthly

Bottom of funnel: proposal → value

KPI	H2 2026 target	Cadence
Proposals submitted	12–15	Weekly
Proposal-stage pipeline	$6M–$8M	Weekly
Weighted pipeline	$2.5M–$3.5M	Weekly
Proposal → close win rate	30%–40%	Monthly
Paying OPO pilots/diagnostics signed	4–6	Weekly
Average pilot/diagnostic contract value	$75K–$200K	Monthly
Average command-center opportunity value	$500K–$750K	Monthly
Sales cycle length	<120 days	Monthly
Time to first value	<30 days from signature	Per deal
Referenceable customers / case studies	2–3 by Q4	Quarterly
Delivery margin per engagement	45%+ gross	Monthly

10. Pipeline governance and forecast definitions

Stage	Definition	Included in $10M?
Target	Account mapped, tiered, and assigned	No
Engaged	Meaningful interaction with role-fit stakeholder	No
Diagnostic accepted	Account agrees to diagnostic/self-assessment/workshop	Partially, if scoped and value hypothesis exists
Qualified opportunity	Need, authority, mission fit, compliance fit, deliverability, estimated value, and timeline confirmed	Yes
Proposal	Written proposal or SOW submitted	Yes
Negotiation	Scope, price, terms, procurement, or legal review underway	Yes
Closed won	Signed agreement	No longer pipeline; becomes bookings/revenue forecast
Deferred/no-chase	Not active or not mission/compliance/delivery fit	No

11. Operating cadence

- **Weekly growth stand-up:** funnel movement by stage, blockers, deal strategy, top 10 opportunities, and next actions.
- **Weekly deal desk:** pricing, deliverability, gross margin, data-use/compliance, and proposal quality review.
- **Monthly executive review:** full-funnel KPI dashboard, conversion rates, weighted forecast, pipeline health, pricing decisions, and deals-not-to-chase.
- **Quarterly board narrative:** proof points, pipeline value, weighted forecast, unit economics, mission outcomes, and expansion plan to transplant centers and beyond.

12. Board / leadership headline

> ***H2 2026 target: build a $10M qualified OPO pipeline that proves UNOS can convert its trusted data, expertise, and customer relationships into mission-aligned performance products — while protecting public trust and creating the commercial operating discipline required for 2027 growth.***

13. Language to use externally

- “Performance improvement”
- “Accreditation readiness”
- “Quality and operational excellence”
- “Burden reduction”
- “Permissioned and governed analytics”
- “Human-governed decision support”
- “Turning data into action”
- “Helping OPOs become more AI-ready and performance-driven”

14. Language to avoid

- “Selling the data”
- “Monetizing patient data”
- “Replacing clinical judgment”
- “AI will solve matching”
- “Guaranteed outcome improvement”
- “Move fast and break things”
- Any claim that implies use of restricted data without permission, governance, or validation
