

UNOS Commercial Tech Stack Roadmap 2026

Marketing + Sales + Philanthropy Operating System | Croom Lawrence | July 2026 | Confidential draft for discussion

1. Executive mandate

UNOS needs a commercial operating system that can support the H2 2026 objective: **build a \$10M qualified OPO sales pipeline** while creating the foundation for 2027 growth across transplant centers, health systems, partners, philanthropy, and mission-aligned data/analytics products.

This roadmap adapts the Acurist AI Operating System pattern to UNOS: **functions become outcomes, tasks become loops, and labor becomes systems** — with human judgment, compliance, and public trust at the center.

The tech stack should do five things immediately:

- **Increase senior selling time:** free Croom/Devin/executives to focus on the largest, highest-value opportunities.
- **Create one commercial brain:** unify marketing, sales, philanthropy, customer intelligence, content, meetings, files, and follow-ups.
- **Turn UNOS data and expertise into products:** package benchmarks, quality improvement, accreditation readiness, AI-readiness, and performance advisory.
- **Run an AI-native account-based motion:** personalized outreach, customer briefs, proposal kits, roundtables, webinars, nurture, and deal governance.
- **Protect mission and trust:** no PHI in agent workflows unless expressly approved; no “selling data” language; human approval for claims, proposals, pricing, contracts, and donor communications.

2. Operating map: \$10M OPO pipeline first

Commercial system	2026 objective	Primary engine	Secondary engine	Retention / expansion target
UNOS Commercial Growth OS	\$10M qualified OPO pipeline	OPO account-based growth	Philanthropy + partner-funded initiatives	2027 recurring subscriptions, advisory, transformation, and expansion

Loop	Purpose	H2 2026 KPIs	Primary tools / trust assets
1. Authority Loop	Position UNOS as the trusted OPO performance, accreditation, and AI-readiness partner	OPO executive reach, content engagement, webinar attendance, inbound meetings	PredictCare/UNOS portal, flagship OPO report, CEO letters, LinkedIn, Beehiiv, webinars, AOPO/NATCO channels, board-ready briefs
2. Acquisition Loop	Identify, tier, engage, and nurture all ~55 OPOs	55/55 mapped, 45+ engaged, 30–35 marketing-qualified accounts	Salesforce/HubSpot, Clay/Apollo/ZoomInfo where allowed, LinkedIn Sales Navigator, Google Sheets account map, Hermes research agents
3. Conversion Loop	Move accounts from interest to diagnostic, pilot, subscription, or command center	25–30 SQOs, 12–15 proposals, \$10M+ qualified pipeline, 4–6 pilots/diagnostics	Salesforce pipeline, proposal generator, ROI model, deal desk, DocuSign/Ironclad, Gong/Fireflies call intelligence
4. Philanthropy Loop	Convert mission narrative into funded initiatives around equity, utilization, quality, AI-for-good, and data modernization	10–15 major donor/foundation targets, 3–5 concept notes, \$1–1.5M partner/grant pipeline	Donor CRM, foundation prospect research, grant calendar, case-for-support generator, Hermes philanthropy agent
5. Retention / Expansion Loop	Convert pilots into recurring products and referenceable proof	2–3 case studies in motion, expansion map per pilot, QBR cadence	Customer success workspace, QBR templates, benchmark dashboards, outcomes tracker, reference program

Operating rules

1. Every role owns a metric: pipeline, meetings, proposals, donor cultivation, content shipped, conversion rate, or customer value.
2. Every workflow writes back to the commercial brain: CRM, Drive, meeting notes, account hub, or KPI dashboard.
3. Every agent has a narrow job and a named human owner.
4. Humans approve anything touching clinical claims, legal terms, pricing, donor asks, contracts, public claims, or restricted data.
5. AI accelerates research, drafting, personalization, synthesis, QA, and follow-up — it does not replace judgment, trust, or governance.

3. Central nervous system — 8 layers

Layer	What it does	Best-in-class stack	Owner
1. Commercial One Brain	Shared operating memory, source-of-truth, task orchestration, and agent execution	Google Workspace/Drive, Slack or Teams, Obsidian/Notion knowledge layer, Hermes-style agent operator, Claude Team/Enterprise, OpenAI/ChatGPT Enterprise, Gemini for Workspace	CGO + RevOps
2. CRM + Pipeline System	Relationship history, accounts, deals, stages, forecasting, activities, executive dashboards	Salesforce as enterprise CRM; HubSpot as marketing automation if Salesforce Marketing Cloud is too heavy; LeanData/Chili Piper for routing; Outreach/Salesloft for sequences if approved	RevOps / Sales
3. Customer Intelligence + Data Room	Account briefs, OPO tiering, market signals, stakeholder maps, competitor/vendor monitoring	Clay, Apollo/ZoomInfo, LinkedIn Sales Navigator, Perplexity/AlphaSense, PitchBook/Grant databases, Hermes research agents, governed internal data extracts	Strategy + Growth
4. Marketing Engine	Content, landing pages, webinars, email nurture, social, analytics, campaign performance	HubSpot Marketing Hub or Salesforce Marketing Cloud Account Engagement, Beehiiv, Webflow/Vercel, Canva, Adobe Express, Descript, Riverside, Metricool/Sprout, GA4	Marketing
5. Sales Enablement + Proposal Factory	Decks, one-pagers, ROI models, proposal/SOW generation, approval workflows, battlecards	Google Slides/Docs, Canva, Qwilr/Highspot/Seismic, DocuSign CLM/Ironclad, PandaDoc, spreadsheet ROI calculators, Hermes proposal agent	Sales + Legal
6. Philanthropy + Grants Engine	Major donor/foundation pipeline, case for support, grant calendar, pledge tracking	Salesforce Nonprofit Cloud / Blackbaud / Virtuous, Instrumentl/Candid/Foundation Directory, GivingData, HubSpot donor-lite track, Hermes philanthropy agent	Philanthropy
7. Meeting + Voice of Customer Intelligence	Capture calls, summarize, extract follow-ups, update CRM, detect objections and product signals	Fireflies, Fathom, Gong, Zoom/Teams transcripts, Hermes meeting-intelligence ingestion, Slack alerts	Sales + Customer Success
8. Governance, Security + Automation Infrastructure	Privacy, data-use controls, SOPs, audit logs, secrets, agent guardrails, integrations	Google Cloud/AWS/Azure, Zapier/Make/n8n/Workato, Vanta/Drata, Okta, 1Password, DLP, audit logs, BAA/DUA tracker, human approval gates	IT + Compliance

4. Agent fleet — best-in-class AI use cases

Fully automatable with guardrails

Agent	Job	Inputs	Outputs	Human owner
Account Research Agent	Build OPO account profiles, stakeholder maps, recent news, performance hypotheses	Public OPO info, CRM notes, meeting notes, approved data	One-page account brief and talking points	Sales lead
Pipeline Hygiene Agent	Monitor stale deals, missing next steps, stage errors, and CRM data gaps	Salesforce/HubSpot	Weekly pipeline cleanup report and task list	RevOps
Meeting-to-Action Agent	Summarize meetings, extract commitments, draft follow-ups, update CRM tasks	Fireflies/Gong transcript	Summary, next steps, draft email, CRM updates	Account owner
Content Repurposing Agent	Turn webinars/briefs into posts, email snippets, short clips, and landing-page copy	Approved transcripts and content	Draft content package	Marketing
KPI Digest Agent	Produce weekly growth dashboard narrative	CRM, campaign analytics, pipeline dashboard	Executive digest: wins, risks, blockers, asks	CGO
Competitive Watch Agent	Monitor vendors, OPTN modernization, OPO market signals, policy changes	Public web, alerts, news	Weekly market intelligence brief	Strategy
Grant Scan Agent	Identify relevant foundations/grants/RFPs tied to equity, utilization, AI-for-good, modernization	Candid/Instrumentl/public RFPs	Target list + concept note starter	Philanthropy

Human-in-the-loop required

Agent	AI drafts	Human approves
Executive Outreach Agent	Personalized OPO CEO/COO/quality leader emails	Any send to named prospect
Proposal / SOW Agent	Scope, pricing structure, implementation plan, KPI	Price, legal terms, deliverability, compliance

	language	
Board / Donor Narrative Agent	Case for support, donor letters, foundation concept notes	Donor ask, claims, financial projections
Clinical / Policy Claims Agent	Evidence summary and claim-risk flagging	Any external clinical, regulatory, allocation, or outcomes claim
Deal Strategy Agent	Account strategy, objections, negotiation prep	Final commercial posture and commitments
Public Content Agent	LinkedIn, newsletter, webinar decks, landing pages	Any public-facing publication

Decision rule

Does it touch **patient data, restricted OPTN/UNet data, clinical claims, public policy, contracts, money, donor asks, or pricing?**

- **Yes:** AI may draft, summarize, or QA — human approval required.
- **No:** AI may execute routine internal workflow with logging and rollback.

5. Recommended stack by phase

Capability	Now: Aug 2026 foundation	Near: Sep–Oct 2026 pipeline acceleration	Far: Nov–Dec 2026 scale + governance
CRM / pipeline	Salesforce pipeline audit; define OPO stages and fields; create \$10M dashboard	Salesforce dashboards live; HubSpot or Pardot nurture connected; weekly deal desk	Forecasting, weighted pipeline, attribution, QBR views, 2027 expansion pipeline
One Brain	Google Drive folder map; Slack/Teams channel; Obsidian/Notion account hubs; Hermes operator	Meeting-to-action and account research agents running; CRM write-back workflow	Persistent agent fleet with audit logs, KPI digests, and executive workflows
Marketing	UNOS portal, OPO plan, database audit, first landing pages, content calendar	Webinar series, OPO self-assessment, benchmark report, ABM nurture streams	Case studies, executive roundtables, partner campaigns, thought-leadership engine
Sales enablement	Deck, one-pager, OPO ROI model, diagnostic offer, outreach templates	Proposal/SOW factory, pricing menu, battlecards, executive brief templates	Automated proposal assembly with legal/compliance gate and margin model
Philanthropy	Mission funding thesis; target foundation/donor list; case-for-support outline	3–5 concept notes; donor/foundation outreach cadence; grant calendar	Partner-funded OPO improvement pool; board-ready donor pipeline dashboard
Meeting intelligence	Fireflies/Gong/Fathom selected; transcript capture; summary template	Auto summary → CRM tasks → account hub; objection library	Voice-of-customer analytics informs product roadmap and messaging
Governance	AI use policy; PHI/restricted-data red lines; approval matrix	Vendor/BAA/DUA review; claim review workflow; deal desk compliance checklist	SOC 2/Vanta/Drata readiness; full audit logs; board risk dashboard

6. Budget — practical starting stack vs enterprise upgrade

Tool / category	Practical starting point	Enterprise / best-in-class upgrade	Why it matters
Google Workspace / Drive	Existing workspace	Enterprise with DLP / Vault	Source of truth for files and permissions
Slack or Teams	Existing collaboration	Enterprise governance + retention	Commercial command center and agent alerts
Hermes-style agent operator	Local/Hermes operator for research, docs, site updates, scheduled digests	Cloud-deployed agent hub with approvals and audit logs	Converts AI from chat into operating capability
Claude / ChatGPT / Gemini	Team plans for drafting/reasoning	Enterprise plans with admin controls, BAA where required	Premium reasoning, writing, analysis, and agent supervision
Salesforce	Existing or core Sales Cloud	Sales Cloud Enterprise + Tableau/CRM Analytics	Pipeline, accounts, forecasting, executive dashboards
HubSpot / Pardot	HubSpot Marketing Starter/Pro if lightweight	Salesforce Marketing Cloud Account Engagement	Nurture, landing pages, email, campaign attribution
Fireflies/Fathom/Gong	Fireflies/Fathom for fast start	Gong for sales-coaching and revenue intelligence	Meeting capture, follow-up, voice-of-customer
Canva / Adobe / Descript / Riverside	Canva + Descript + Riverside	Brand-managed creative workflow	Fast collateral, webinars, clips, social
Clay/Apollo/ZoomInfo	Start with LinkedIn + public research + Apollo/Clay test	ZoomInfo / Definitive / AlphaSense as needed	Account intelligence and contact data
DocuSign/Ironclad/PandaDoc	DocuSign + Google Docs	CLM with approval routing	Contracts and proposal discipline
Vanta/Drata/1Password/Okta	1Password + vendor checklist	Full security/compliance automation	Trust, auditability, and board confidence

7. Required data model for the commercial brain

Object	Required fields
Account	Segment, tier, OPO/center/partner type, region, owner, value hypothesis, maturity score, risk/readiness score, last touch, next action
Contact	Role, influence, relationship status, communication preference, meeting history, objections, decision criteria

Opportunity	Stage, package, estimated value, weighted value, close date, executive sponsor, compliance status, delivery owner, margin estimate
Campaign	Audience, message, asset, source, spend/time cost, engagement, meetings generated, opportunities influenced
Philanthropy prospect	Mission fit, program interest, giving capacity, relationship owner, concept note, next ask, restrictions
Asset	Audience, use case, approval status, owner, date, claims review, source links, next refresh
Meeting	Attendees, account, summary, decisions, follow-ups, CRM updates, risks, product signals

8. Now / Near / Far implementation roadmap

Workstream	NOW — first 30 days	NEAR — 60–90 days	FAR — by Dec. 31, 2026
Revenue operations	Define pipeline stages, fields, \$10M dashboard, deal desk, owner map	Weekly forecast cadence; stage conversion reporting; stale-deal automation	Board-ready forecast and 2027 expansion pipeline
OPO ABM	Map and tier all ~55 OPOs; create top-20 account briefs; first 20 executive emails	OPO webinar + self-assessment; 18–22 diagnostics accepted/started	25–30 SQOs; 12–15 proposals; \$10M+ qualified pipeline
Marketing engine	Content calendar, landing pages, database audit, OPO plan, message architecture	Benchmark report, nurture sequences, LinkedIn/newsletter cadence, roundtable invite engine	Case studies, reference content, partner campaigns, annual report narrative
Sales enablement	Deck, one-pager, ROI model, proposal template, qualification scorecard	Proposal factory + legal/compliance approval workflow	Automated proposal assembly; battlecards and objection library
Philanthropy	Mission funding thesis and top 25 donor/foundation map	3–5 concept notes; partner-funded OPO improvement pitch	\$1–1.5M partner/grant pipeline and donor dashboard
Agent fleet	Stand up account research, meeting-to-action, KPI digest, content repurposing agents	CRM write-back, pipeline hygiene, competitive watch, grant scan agents	Agent audit logs, recurring executive digests, workflow QA, continuous improvement
Governance	AI approval matrix, restricted-data red lines, vendor inventory	BAA/DUA/vendor review and claim review gates embedded	Compliance dashboard; SOC 2/Vanta/Drata readiness assessment

9. First 30 actions

#	Area	Action	Owner	Output
1	RevOps	Confirm Salesforce as canonical CRM and audit fields/pipelines	RevOps	CRM gap list
2	RevOps	Create OPO account object/field requirements	RevOps + Sales	Data model
3	RevOps	Build \$10M qualified pipeline dashboard	RevOps	Dashboard v1
4	RevOps	Define stage exit criteria and forecast categories	CGO + RevOps	Pipeline governance SOP
5	Sales	Map all ~55 OPOs and assign owners	Sales	Account coverage map
6	Sales	Tier top 20 by readiness, risk, relationship, and deal value	Sales + Strategy	Tiering table
7	Sales	Generate top-20 one-page account briefs	Hermes research agent + Sales	Brief packet
8	Sales	Draft executive outreach templates by persona	Hermes + CGO	Email library
9	Sales	Build OPO diagnostic qualification scorecard	Sales + Compliance	Scorecard
10	Sales	Create proposal/SOW template for diagnostic and command center	Sales + Legal	Proposal kit
11	Marketing	Build OPO message architecture	Marketing + CGO	Messaging doc
12	Marketing	Publish/refresh landing-page materials on private portal	Marketing	Portal assets
13	Marketing	Draft flagship State of OPO Quality & AI-Readiness report outline	Hermes + Marketing	Report outline
14	Marketing	Build webinar/roundtable calendar	Marketing	Event calendar
15	Marketing	Create LinkedIn/newsletter content calendar	Marketing	8-week calendar
16	Philanthropy	Define mission funding thesis	Philanthropy + CGO	Case-for-support v1
17	Philanthropy	Map top 25 foundations/donors/partners	Philanthropy agent	Prospect list
18	Philanthropy	Draft 3 concept-note templates	Hermes + Philanthropy	Concept note pack
19	Agent Ops	Stand up meeting-to-action workflow	RevOps + Hermes	Transcript → tasks SOP
20	Agent Ops	Stand up account research agent	Strategy + Hermes	Account brief workflow
21	Agent Ops	Stand up weekly KPI digest agent	CGO + Hermes	Friday digest

22	Agent Ops	Stand up pipeline hygiene agent	RevOps + Hermes	Stale deal report
23	Governance	Draft AI use and approval policy	Compliance + CGO	Approval matrix
24	Governance	Identify restricted data / PHI / OPTN data red lines	Compliance	Red-line checklist
25	Governance	Create claims-review workflow for public materials	Compliance + Marketing	Claims gate SOP
26	Enablement	Build OPO deck, one-pager, ROI model, and battlecard	Sales + Marketing	Enablement kit
27	Enablement	Create objection library from current conversations	Sales	Objection map
28	Reporting	Create weekly executive growth review template	CGO	Review deck
29	Reporting	Create board narrative template: pipeline, mission, risk, proof	CGO + Finance	Board page
30	Improvement	Start lessons-learned loop after every meeting/proposal	All	Continuous improvement log

10. Board / leadership headline

UNOS should run Marketing, Sales, and Philanthropy as one AI-enabled commercial operating system: a governed One Brain that converts trusted data, expertise, relationships, and mission into a \$10M qualified OPO pipeline in 2026 — and a scalable growth platform for 2027.

11. Language to use externally

- “AI-enabled commercial operating system”
- “Trusted performance infrastructure”
- “Accreditation readiness and quality improvement”
- “Human-governed decision support”
- “Permissioned and governed analytics”
- “Customer AI-readiness and technology maturity”
- “Mission-aligned growth and sustainability”
- “Turning data into action while protecting trust”

12. Language to avoid

- “Selling the data”
- “Monetizing patient data”
- “Replacing clinical judgment”
- “AI will solve matching”
- “Guaranteed outcome improvement”
- “Move fast and break things”
- Any claim implying unrestricted access to restricted OPTN/UNet/DonorNet data without permission, governance, or validation
